Message from the Mayor...

With the New Year upon us it's time to look forward to many of the opportunities that are at our doorstep. As with all of our neighboring communities, we also are being confronted with growth issues that can change our little city. It is very important to the Planning Commission and the City Council that this wave of interest always fit in the General Plan, Building and Construction Standards, City Codes and Ordinances and the State codes that are the main tools used to guide this growth. It can be complicated to deal with.

The returns on the feedback forms have reached the 20% mark. The goal is to have at least 30% of the forms returned. The forms are going to be read and used by both the Planning Commission and the City Council as the General Plan is updated this year. If for some reason, the Feedback Form is still sitting on your kitchen counter, in a drawer or on a desk, please take a few minutes and thoughtfully look it over. We really need to hear from you. Most of the returns have great ideas and comments and a few are just downright rude but all of them are welcome and needed for consideration. We need to know what you are thinking. Thanks to the 110 of you that are being heard at this point. You are much appreciated.

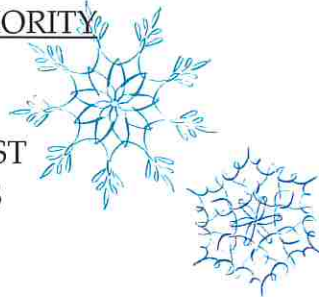

Next month I will share a sampling of what is being sent back to the office. No names will be used but as this is identified as the 'public interest', it is important that you know what your neighbor is thinking. As diverse as we are here in the way we think and act, I am always pleased to represent Elk Ridge at the many monthly meetings and the occasional seminars I attend with all of the other Mayors in the county and state. This is a great place to live.
