This form approved by Utah County and the municipalities therein.

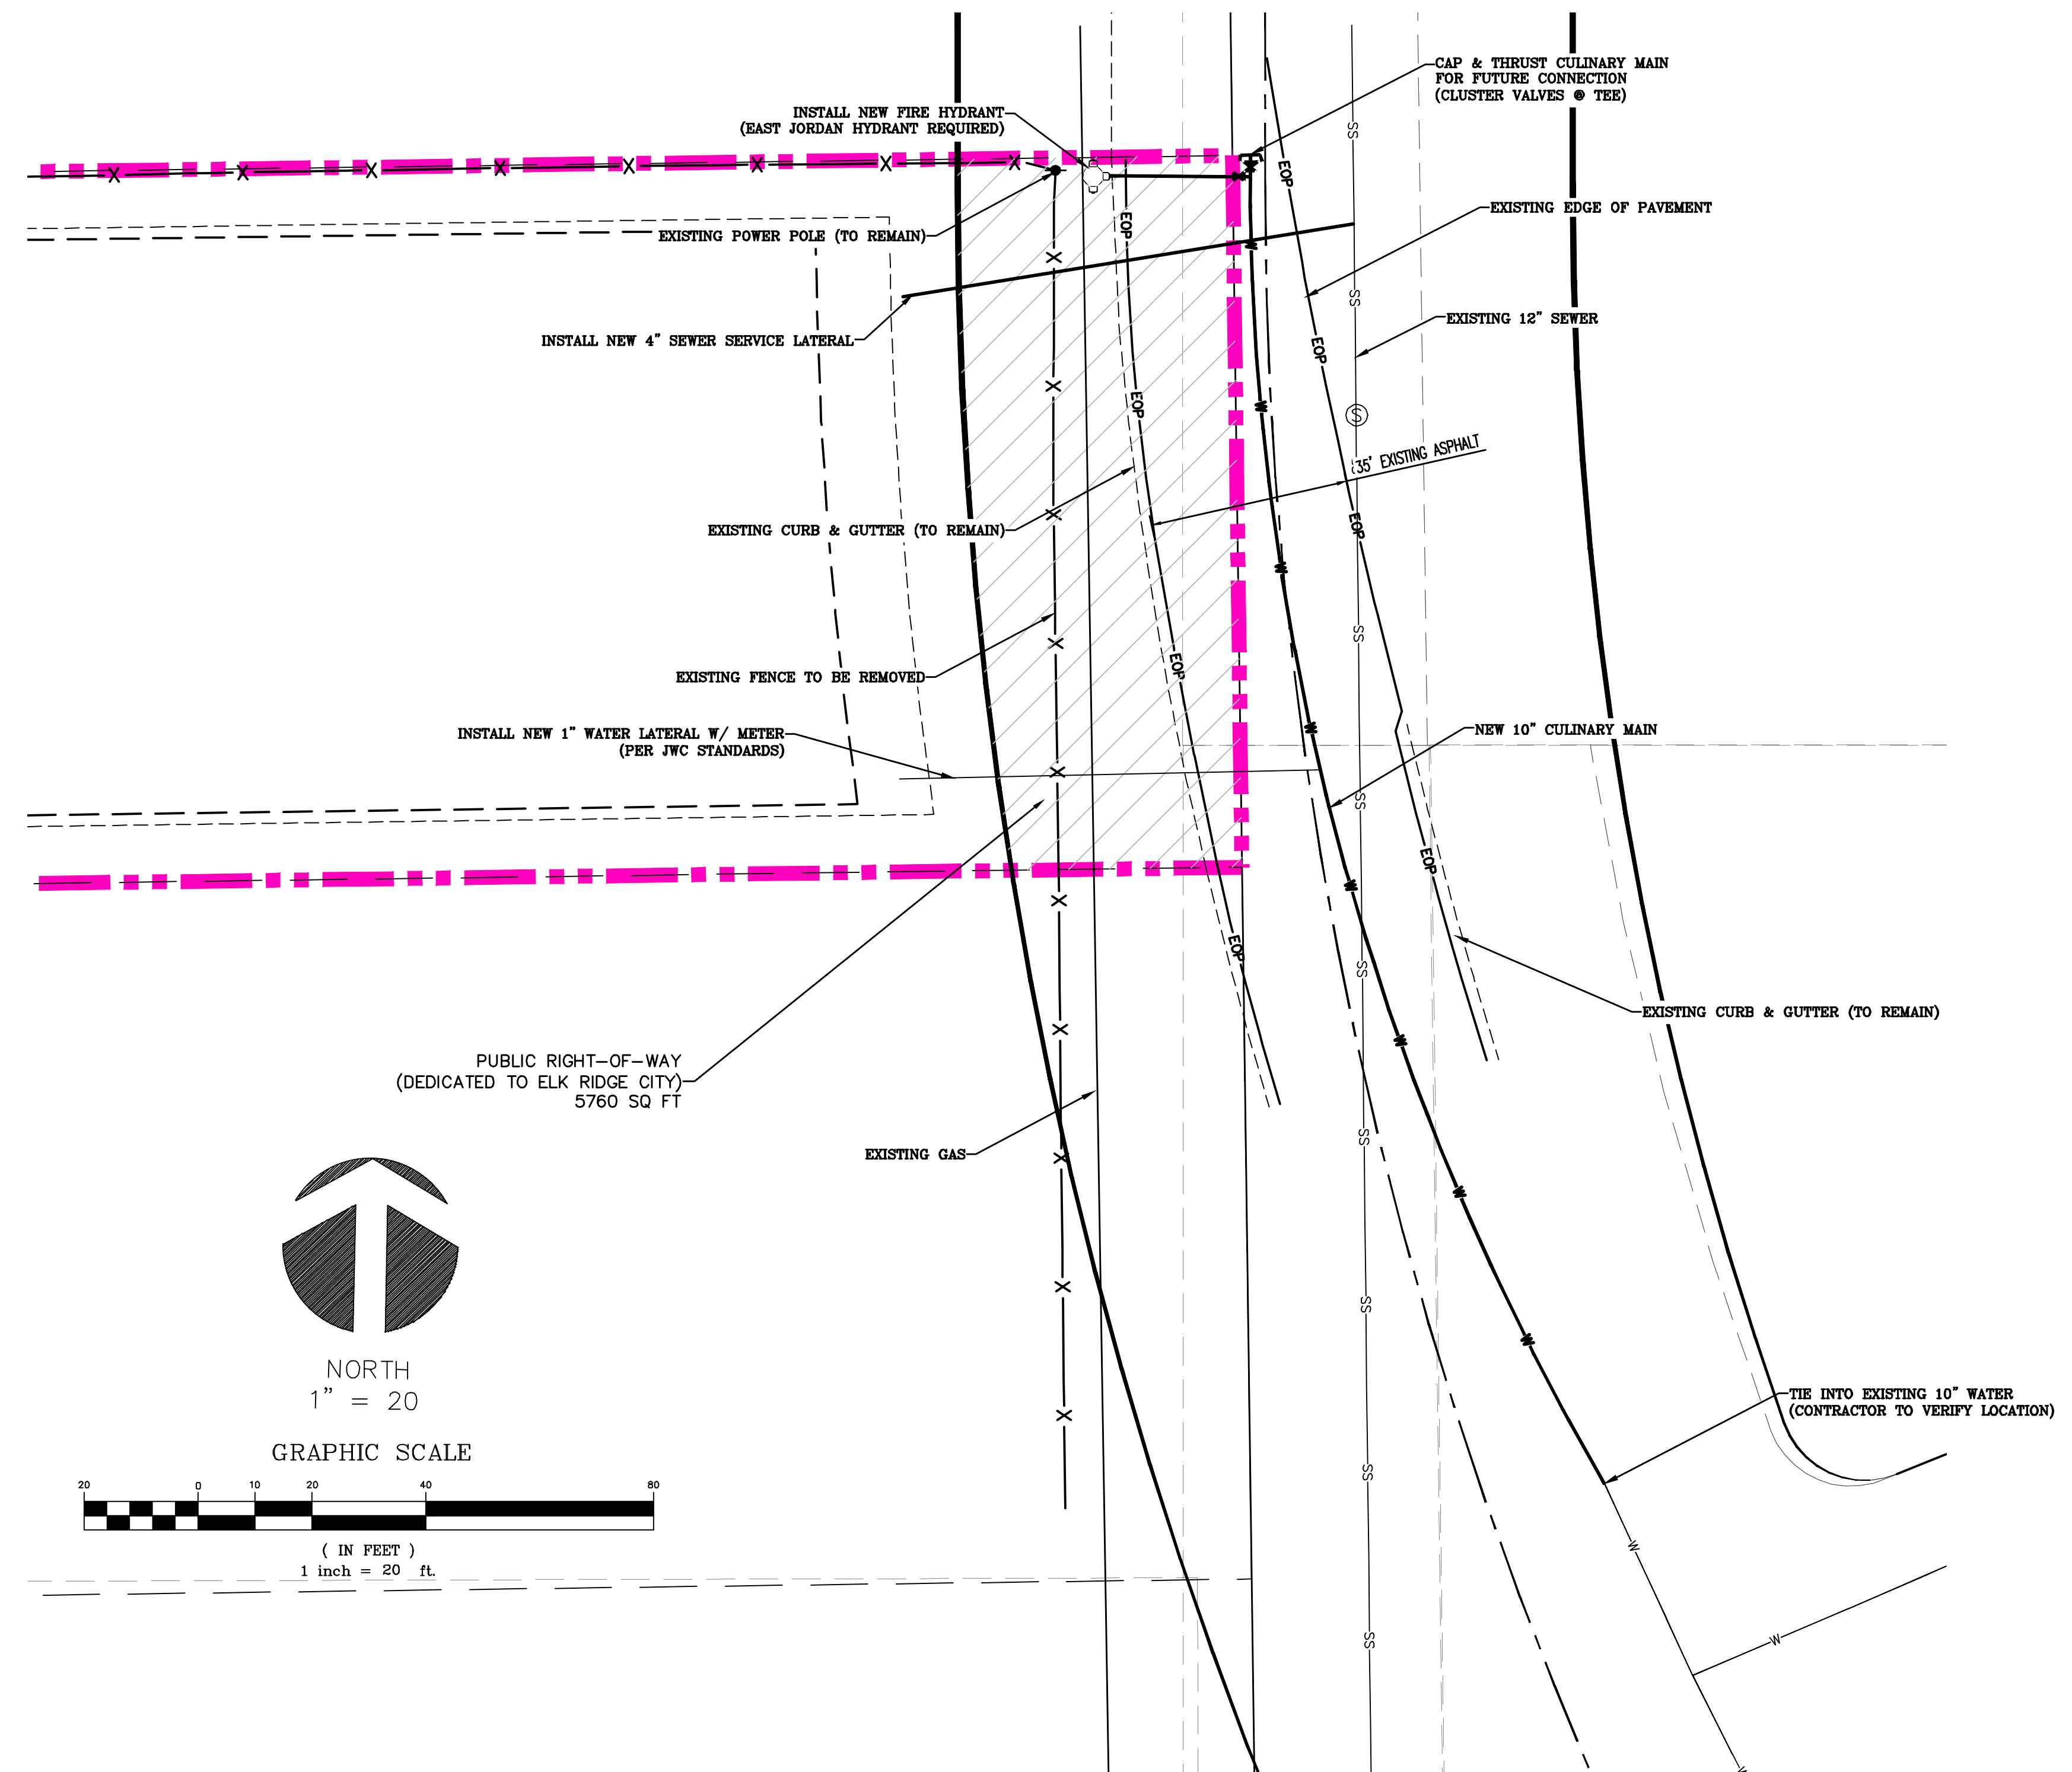

APWA Detail 255 shall be used for the pavement patch for trenches. In areas where there are multiple cuts required for trenching a 1" thick half width pavement overlay is required to prevent future separation at joints to go through the full thickness of the pavement and to minimize the exposed joints. In this case an overlay form the center of the street to the edge of pavement shall be required on the half width of the street containing the water line trench and an overlay covering the water and sewer laterals.

SHALLOW EXCAVATION
