Subject: Fire Hydrant for the Layla Subdivision

The fire support for the Layla subdivision comes from the fire hydrant located at the corner of Hudson and Canyon View and is within the prescribed distance as required by city code.

There will be no need to put in additional hydrants at this time.

Based upon future building plans and risk mitigation, Elk Ridge City may need to require one in the future if current fire flow requirements cannot be met at the time of construction.

Questions may be directed to the undersigned at the phone numbers above.
